## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-13, 20-22, 27-32, drawn to a cloning system (composition) and a host cell.

Group II, claims 14-19, 23-26, 33 and 34, drawn to a vector and a host cell comprising the vector.

Group III, claims 35-43, drawn to a method of producing a vector containing a target nucleic acid.

Group IV, claim 44-47, drawn to a method of producing a recombinant DNA.

2. For the purposes of this restriction requirement, claim 33 (and dependent claim 34) is drawn to a cell comprising the vector of claim 1 or 18. In view of the general claims structure, and since claim 1 is not drawn to a vector, it is assumed that claim 33 contains a typographical error, and should read "claim 14 or 18". If this is indeed the case, then the restriction as set forth above is correct. If on the other hand there is not a typographical error and claim 33 is indeed

Art Unit: 1636

dependent upon claim 1, then claims 33 (and dependent claim 34) are generic to groups I and II, and will be examined as the subject matter relates to the elected group.

3. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of claim 1 is not novel as shown for example in US 6,495,318, and therefore, does not provide a special technical feature.

Inventions of Group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the elements of the cloning system of Group I are biologically, physically, and patentably distinct from the elements of the vector of Group II.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
